DETAILED ACTION

Note: This Office Action is in response to Amendment filed 01/13/2006.

Furthermore, terminal disclaimer filed 01/13/2006, has been received and made of record.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Purdy (U.S. 5,693,067).

Purdy discloses the claimed invention as shown in figures 7-11, a blood vessel engaging portion (108) and a lumen blocking portion (112) including (104,304), wherein the lumen blocking portion is clearly capable of fully block the flow of blood in at least one direction through the lumen of blood vessel (6) and furthermore, wherein the lumen blocking portion (112) being penetrable in site by advancement of a penetrating member (4) through the lumen blocking portion (112) while the device is implanted within the body lumen (see col. 7, line 47 to col. 8, line 52).

Response to Arguments

Applicant's arguments filed 01/13/2006 have been fully considered but they are not persuasive. With respect to claim 1, according to the applicant, the lumen blocking portion of Purdy can not fully block the flow of blood in at least one direction and furthermore, Purdy device does not teach or suggest a penetrating member for advancement of the lumen of blocking portion. This is simply not convincing due to the teaching of Purdy in (col. 7, lines 47-51 and line 66 thru col. 8, line 29) that the fabric cover of Purdy is considered fully block the flow of blood in at least one direction and also, the introducer (4) can be used to push the device (100) to deploy the device (100). As the result of this, the Examiner disagrees with Applicant's remarks and has maintained the grounds of rejection under 35 U.S.C. 102 (e) as being anticipated by Purdy for the same reasons as set forth in the previous office action.

Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
